Mexican

Urgent need for international solidarity with electrical workers

- News from around the world -

The right-wing Felipe Calderón administration's attempt to destroy the Mexican Electrical Workers Union (SME) in order to privatize the electricity industry is causing unprecedented tension in the country between the working class and the government.

The union's decision to stand firm in the defense of its members may spark violence on the part of the right-wing government.

We call on you to be vigilant and follow the events in Mexico, and, if necessary, carry out protests in front of the Mexican embassies in your countries.
